

Grow your own mould

Place a piece of fruit in a warm place and watch what happens. Record your observations in a diary.

Create your own blood

Follow these instructions to make blood in a bottle.

<https://bit.ly/1ViE52c>

Create and make a model of the digestive system.

Make a step by step guide of how to put somebody into the recovery position.

Visit Peterborough Museum's 'Operating Theatre' to learn about hospitals in the past.

Year 4 Medicine Homework Menu

Interview a medical professional (e.g. doctor, nurse, chemist, dentist, optician) about their job. Write your own questions to find out as much as you can to report back to the class.

Use the shell of a hardboiled egg and place the same amount of shell in different containers. Add a different liquid to each container e.g. fizzy drink, orange juice, water and milk. Leave it for a few days and observe what happens.

Research revolting medicines from the past and create a fact file of your favourite discoveries.

What will medicine be like in the future? Create a medicine for the future and present it in an imaginative and creative way.

Based on your knowledge of growth mindset, create a model of how the brain learns.
