Learning Living Loving Together

18th September 2019

Dear Parent/Carer

Autumn Term Homework 2019-2020

Please find attached your child's homework map for this term. In addition to the homework, all children in KS1 will have reading three times a week and spellings. In KS2, the children will have reading three times a week, spellings and maths timestables. Reception children will have tub words and reading books as appropriate.

There will be a new homework map for each term and it will always be sent out at the start of term. We ask that you help your child to pick two for each term, so there will be six homework activities a year. These activities will compliment what the children are doing in the classroom. They will not be the traditional based homework tasks but encourage family-oriented activities. We will be encouraging families to talk about their child's class based learning at home.

We believe that homework is more interesting, engaging and develops multiple skills like critical thinking, creativity and an inquiring mind.

Year 6's will have some written and maths homework to support them through SATs. This will be revision questions and revision books.

The first homework will be due on Monday 14th October with the second being due on Monday 9th December.

Yours faithfully

Mr D Smith
Deputy Headteacher

Design a map to show locations of volcanoes around the world.

Make a model of the Earth and its layers.

Create and build your own volcano at home using vinegar and bicarbonate of soda! What do you think is going to happen? Record your findings and present them as you wish.

Create your own weather station thinking about what you will need and why - What is your weather station going to track?

Keep a weather diary for a week, noting down temperature and weather.

Write story in the style of a diary entry about going on a journey and discovering a fossil.

Create a survey to find out how many different types of rock you can find in your local area. You could record your results in a tally chart and display in a graph.

Visit your local library and use books to create a fact file about a natural disaster.

Find out about five natural disasters that have occurred in the past. Create a PowerPoint presentation to share your findings.

Year 3

Eruptions and Destruction
Homework Menu

Make a collage out of rocks. You could arrange the rocks on the ground to make a picture and photograph your creation to bring into school.
